Integrating Commerce and JumpSeller | Coinbase Cloud
This page explains how to integrate Coinbase Commerce and [JumpSeller](https://jumpseller.com/), an e-commerce platform. Integrating JumpSeller with Commerce lets you accept cryptocurrency payments peer-to-peer.

Summary of Steps[](#summary-of-steps "Direct link to Summary of Steps")
----

1. (In Commerce) [Create](#1-create-commerce-api-key) an API key and copy/save your new API key.
2. (In JumpSeller) [Add](#2-add-payment-method) Coinbase as a payment method and paste the key, then copy the JumpSeller webhook URL.
3. (In Commerce) [Paste](#3-add-endpoint) the URL to add a webhook subscription and copy/save your webhook secret.
4. (In JumpSeller) [Paste](#4-authenticate-commerce) the webhook secret to authenticate Commerce.

Add Coinbase as Payment Method[](#add-coinbase-as-payment-method "Direct link to Add Coinbase as Payment Method")

1\. Create Commerce API Key[](#1-create-commerce-api-key "Direct link to 1. Create Commerce API Key")

1. Log in to [Coinbase Commerce](https://beta.commerce.coinbase.com/).

2. From your avatar, click **Settings** and go to the **Security** tab.

3. Under **API keys**, click **New API key** to generate a new key.

4. Click **Copy to clipboard** and securely store your new API key.

    Click image to enlarge

    ![Create a Coinbase Commerce API key so that you can authenticate your account, for example, when integrating into a 3rd party app.](https://docs.cloud.coinbase.com/assets/images/commerce-new-api-key-

bf68ac7c7364ce2144ad18f4e4bf8960.png)

2\. Add Payment Method[](#2-add-payment-method "Direct link to 2. Add Payment Method")

1. Log in to [JumpSeller](https://jumpseller.com/login/) and go to the admin panel of your store.

2. Go to **Checkout > Payments**, select "Coinbase", and click **Add Method**.

3. Paste the Coinbase Commerce API key you created above.

4. Copy the JumpSelleer URL that displays in bold, for example:

    ```
https://{YOUR-STORE}.jumpseller.com/en/checkout/coinbase/ipn

```

Add Webhook Subscription[](#add-webhook-subscription "Direct link to Add Webhook Subscription")

3\. Add Endpoint[](#3-add-endpoint "Direct link to 3. Add Endpoint")

1. Log in to [Coinbase Commerce](https://beta.commerce.coinbase.com/).

2. From your avatar, click **Settings** and go to the **Notifications** tab.

3. Under **Webhook subscriptions**, click **Add an endpoint**.

4. Paste your webhook URL and click **Save**.

5. Click **Show shared secret**, then **Copy to clipboard** and securely store your secret.

    Click image to enlarge

    ![Add the endpoint of a 3rd pary app in Coinbase Commerce to create a webhook.](https://docs.cloud.coinbase.com/assets/images/commerce-add-webhook-13d2e8301c6209569d2ceec8b8d84338.png)

4\. Authenticate Commerce[](#4-authenticate-commerce "Direct link

to 4. Authenticate Commerce")

1. Return to Jumpseller.
2. Paste the Commerce shared secret in **Secret key for events** and click **Save**.
